

# Redicote® E-4850

Emulsifier for cationic rapid- and medium-setting bitumen emulsions suitable for chip seal (surface dressing), tack coat and open graded cold mix

### Benefits and features

#### • High emulsion viscosity:

Emulsions prepared using Redicote E-4850 have significantly higher viscosities, which allow specifications to be met at the minimum bitumen content

#### • Low use level:

0.15-0.30% is normally sufficient for rapid-set emulsions

# Storage and handling

Redicote E-4850 may be stored in carbon steel tanks. Bulk storage should be maintained at 50-60°C (122-140°F). Avoid extended heating above 65°C (150°F). Redicote E-4850 contains amines and may cause severe irritation or burns to skin and eyes. Protective goggles and gloves must be worn when handling this product.

For further information consult the Safety Data Sheet.

## Packaging information

Redicote E-4850 is available in bulk shipment, or in tight head steel drums of 360 lbs (163 kg) net weight.

# Dosage

Cationic rapid set emulsion	0.15-0.30%	pH 1.5-3 hydrochloric acid
Cationic medium set emulsion	0.30-0.45%	pH 1.5-3 hydrochloric acid
