

Rediset® LQ-1200A

Compaction aid for hot and warm mixes. Lower odor and storage stable in hot binder. Allows a reduction in mixing and paving temperatures while providing active and passive adhesion.

Benefits and features

- Active adhesion**
 Bitumen treated with Rediset LQ-1200A has the ability to coat damp aggregate which ensures good coverage even at lower mix temperatures
- Heat stability**
 Performance is maintained after long storage in hot bitumen
- Improved workability and compaction**
 Mixes remain workable to lower temperatures and are easier to compact, which enables cool weather paving, longer haul distances and faster paving operations
- Moisture resistance**
 Treated bitumen has exceptional long-term adhesion enabling mixes meet specifications for moisture resistance. Additional antistrip is not required.
- Lower odor**
 Contains less volatile ingredients which reduces odor at higher mixing temperatures

Storage and handling

Rediset LQ-1200A may be stored in carbon steel tanks. Bulk storage should be maintained at 20-30°C (68-86°F). Rediset LQ-1200A contains amines and is corrosive to skin and eyes. Protective gloves and safety goggles must be used when handling this product. For further information consult the Safety Data Sheet.

Dosage

Hot and warm mix*	0.3-0.8%	basis binder
Compaction aid for hot mix	0.3-0.5%	basis binder
Antistrip	0.3-0.5%	basis binder

*Dosage dependent on magnitude of temperature reduction and type of mixes

Specification

Amine value, mg KOH/g	max 730	SMA CL002
Water, %	max 1	SMA CL007

Physical properties

Appearance at 25°C (77°F)	liquid			
Flash point, °C	154 (309°F)			
Pour point, °C	<-15 (5°F)			

	10	20	30	40	°C
